

Savia Art™

The masterpiece of hearing performance

PHONAK
hearing systems

Savia Art is my personal masterpiece

I lead an active life, and therefore good effortless hearing is vital for me. I depend on hearing well, whether at work, during a meeting, attending conferences, or winding down at the end of the day with my favorite music.

Recently, I noticed that I have difficulty understanding, especially when in noisy situations. When it became evident that I needed amplification, I researched my options. I chose Savia Art. I immediately appreciated its excellent sound quality. In my everyday life, I found the automatic adaptation to all situations, as well as the ability to separate speech from noise very helpful. My Savia Art instruments are so small and cosmetically appealing they are literally invisible. In short, since I have purchased Savia Art my quality of life has dramatically improved. I am much more relaxed during the day, and significantly less tired in the evening.

I now recommend Savia Art to anyone with a hearing problem, it's hearing like I used to.

A masterful palette of innovations

Phonak has been dedicated to making a meaningful, positive difference to the lives of people with hearing loss for over 40 years. This unrivalled experience and expertise has led to a palette of the most advanced hearing systems available. With pioneering, groundbreaking features, these hearing systems bring significant benefits to users of all ages.

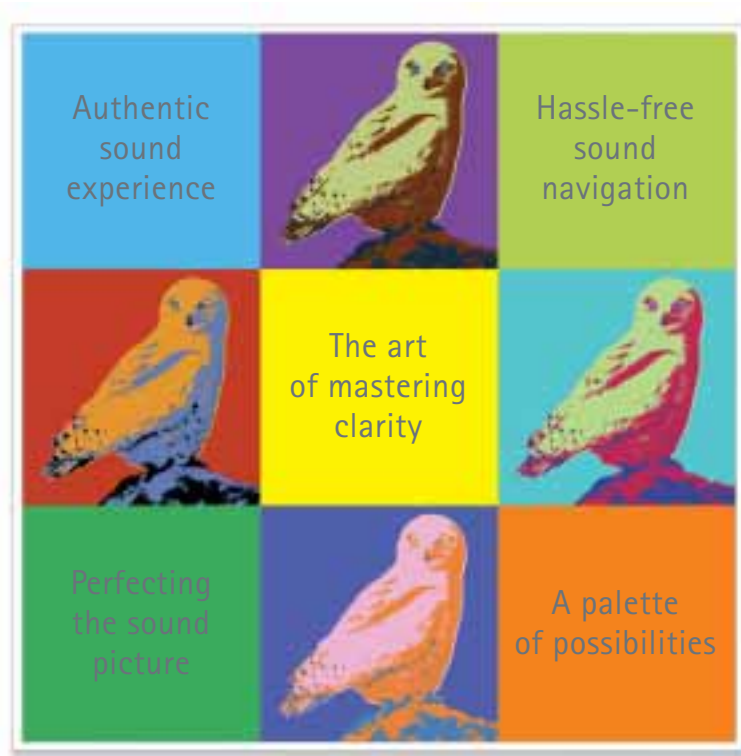

Savia Art is a brand new, high-end hearing system with unparalleled performance and unique features. With state-of-the-art digital technology, Phonak created superb sound quality and versatile functionality.

Savia Art meets the highest expectations:

- More hearing in more environments automatically – the equivalent of six hearing instruments in one
- The most authentic sound – a pure sound experience

- Added intelligence and unprecedented convenience through the instruments' ability to learn and automatically integrate your volume preferences
- Premium performance combined with invisibility in micro style instruments
- The highest level of personalization of any system, masterfully tailored to your individual needs

- Canal Receiver Technology
- Sound Delivery System
- Wireless solutions

AutoPilot – The art of hassle-free navigation through your world of sound

Hassle-free
sound
navigation

The challenge

One of the biggest challenges for hearing instruments is meeting your needs for optimum performance in a variety of listening environments, such as music or having a conversation in noise. The best way to meet this challenge is to use different hearing programs designed to match each situation. This, however, requires manual selection of the right program for the right situation, which is not very convenient. Conventional automatic hearing instruments are based on a single program that adapts slightly to the different situations.

AutoPilot incorporates six automatic programs and selects the right program for the right situation.

The Savia Art solution

Savia Art gives you the best of both worlds: the convenience of automatic function and access to six different programs. The Savia Art **AutoPilot** function automatically selects one of six different programs that ideally suits your listening needs. They include a program for calm situations, speech in noisy situations, comfort in noise, listening to music, telephone and one for the use of wireless accessories, if required.

The result

Savia Art enables you to enjoy the beauty of hassle-free listening, regardless of situation.

Pure sound experience – Naturally authentic

Authentic
sound
experience

The challenge

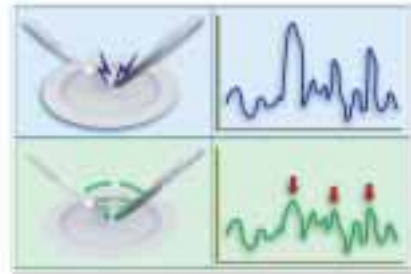

When heard through a hearing instrument, impulse sounds, such as dishes clanging, or paper rustling, can be annoying. Other hearing systems either do not address this issue at all, or in addressing this challenge, introduce unwanted distortion.

The Savia Art solution

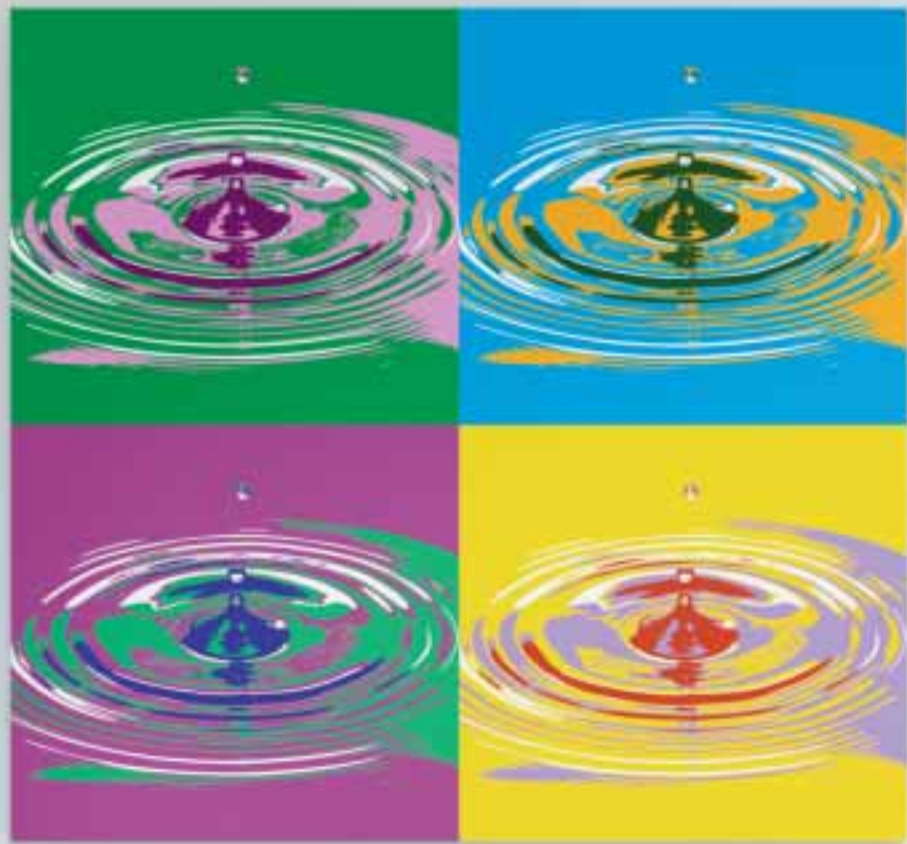

Savia Art has a breakthrough feature called **SoundRelax**. It detects all potentially annoying sound peaks, and reduces their volume instantaneously, completely avoiding annoyance. Unique to the **SoundRelax** process is that the true nature of the sound is maintained.

The result

Authentic sound quality that ensures listening is more relaxing and far less tiring for you.

SoundRelax suppresses annoying impulse sounds without affecting sound authenticity.

SoundCleaning – The art of mastering clarity

The art
of mastering
clarity

The challenge

Not all of the sounds around us need to be amplified in the same manner. While speech should be loud and clear, background sounds should stay in the background. In addition, embarrassing whistling (feedback) by the hearing instruments should be eliminated, without affecting sound quality.

The Savia Art solution

The comprehensive SoundCleaning package effectively suppresses more disturbing noises than any other hearing system, giving you superb sound clarity and excellent speech understanding. Whistling can be embarrassing when wearing hearing instruments. The key to the **NoWhistle Technology** is fast action to remove whistling while volume and sound quality are maintained.

Another aspect of the SoundCleaning performance addresses listening in adverse conditions such as when echo, wind or other background noises are

present. The SoundCleaning tools expertly reduce annoying sounds while maintaining your ability to converse. For example, the **EchoBlock** feature ensures exceptional hearing in echo-filled environments by removing disturbing echo. The specially developed **Wind Noise Management** removes the annoyance factor from wind that wearers of other systems often complain of. In addition, Savia Art has the proven solution when it comes to enabling communication in noisy places thanks to **digital SurroundZoom**, the most sophisticated directional microphone system ever created.

The result

Savia Art provides you effortless and pleasurable hearing in all situations.

Self Learning – Automatically perfecting your sound picture

Perfecting
the sound
picture

The challenge

Once you start listening with new hearing instruments in real life situations, you may find you sometimes want more or less volume. This is natural. With other hearing instruments, these volume changes need to be made by you repeatedly or, for a permanent change, you have to see your hearing care professional.

The Savia Art solution

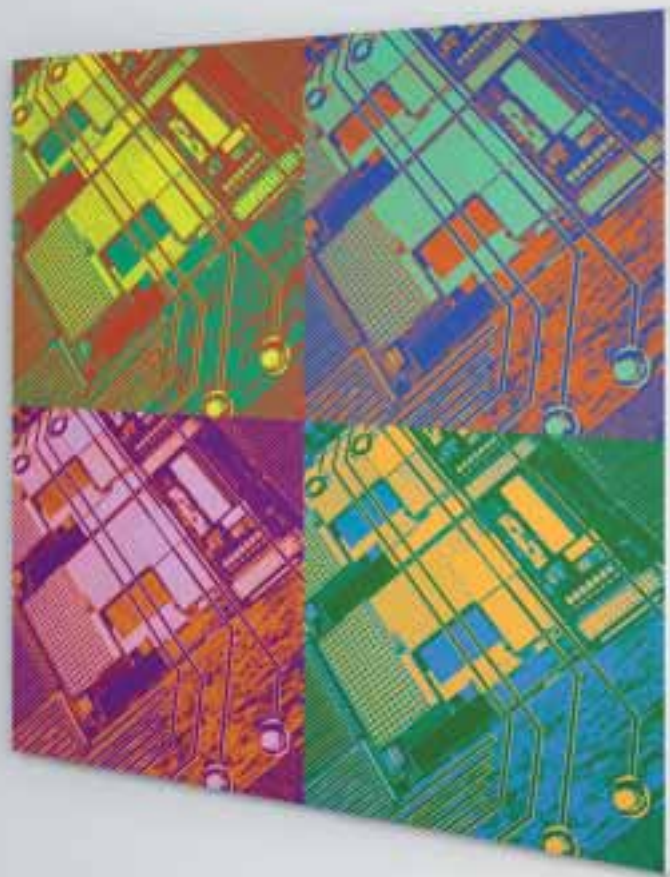

Savia Art features **Self Learning** which learns, remembers and then adapts to all of your volume preferences. Unique to Self Learning is its ability to separately log and apply volume changes per situation while in the automatic mode, giving you both fully personalized volume settings and ultimate convenience.

The result

Savia Art adapts to your personal loudness preferences, letting you create your own personalized sound picture.

Self Learning provides automatic adaptation to situation-based user volume preferences.

The Savia Art product range – A palette of possibilities

A palette
of possibilities

The challenge

High-end hearing systems must meet the highest expectations in terms of the state-of-the-art performance benefits, ultimate convenience and unrivalled cosmetics.

The Savia Art solution

Savia Art by Phonak is the most complete high-end line of hearing instruments, with no less than 12 models to choose from. The Savia Art range offers two **micro styles** which are literally invisible when worn and are the only instruments of this size to

offer the most sophisticated performance features. They can also be adapted to meet changing hearing needs over time. The Savia Art **custom instruments**, built to fit your ear and individual hearing needs, also offer the full spectrum of cutting edge sophistication.

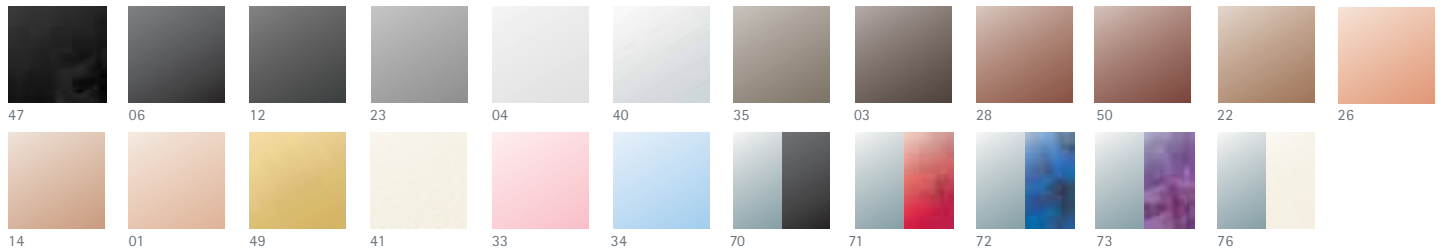

The Savia Art **high power solutions** uniquely combine maximum audibility with highly innovative performance, to support your hearing ability in noise and your hearing comfort.

The full Savia Art range is beautifully partnered by a comprehensive choice of **wireless solutions**. Phonak offers three different elegant **remote control** designs, for the easiest and most discreet way of simultaneously making manual changes to both of your hearing instruments. Furthermore, for extra help in difficult listening environments, miniaturized **wireless FM systems**, pioneered by Phonak, make understanding speech, where noise, distance or reverberation are present, a reality.

The result

With such a versatile palette of possibilities, your Savia Art is your personalized masterpiece.

Phonak offers a wide palette of color choices for all models, which allow you to further personalize your Savia Art Instrument.

At the pulse of innovation

The Phonak Group specializes in the design, development, production and worldwide distribution of technologically advanced wireless systems and hearing solutions. The combination of expertise in hearing technology and strong cooperation with hearing healthcare professionals allows Phonak to make a substantial improvement in the quality of life of individuals with hearing impairment and those close to them.

Today, with multiple brands, the Phonak Group offers a complete range of digital hearing instruments, along with high tech specialty products and complementary wireless communication systems. With more than 3,400 employees worldwide, the Phonak Group is one of the technology leaders in the industry.
